

PROTECT YOUR EMPLOYEES  
WITH A HEALTHY BUILDING

# A Healthy Building

Poor employee health reduces productivity and has a direct impact on the cost of operating your business. Provide your employees (and customers) a clean and **Healthy Building** to reduce the risk of absenteeism and increase your bottom line.

Maintaining a **Healthy Building** for your customers and staff will provide peace of mind and a safer environment for everyone. According to the CDC, routine cleaning and disinfecting reduces the risk of spreading illnesses. While cleaning removes dirt and soil, only disinfecting has the ability to kill germs and viruses. Make sure that you have both a cleaning and disinfecting program in place to provide the most protection.

It's also important to remember that disinfecting once is not enough. A contaminated person can reintroduce germs and viruses to your workspace. Having a regular cleaning and disinfecting schedule provides the best protection for your staff, customers and business.

Trust Jani-King for a clean and **Healthy Building** every day.
