

THE IMPACT OF A HEALTHY BUILDING

How Much Could a Dirty Building Cost Your Business (and Bottom Line)?

Absenteeism: refers to an employee's unscheduled absence during a normally scheduled work period

Productivity: labor efficiency in producing goods or services

\$575 billion

Annual cost of absenteeism and lost productivity to US employers*

\$3,900

Absenteeism and lost productivity costs per employee per year*

7 Days

average number of sick days per employee per year

30%

number of employees that go to work while feeling sick**

Hours to Days

Estimated survivability of Coronavirus on surfaces

48 Hours

Amount of time the flu virus can "live" on surfaces

24 Hours

Amount of time the common cold can remain infectious on surfaces

2-3

Number of *times per year* adults have a cold

Reduce the risk of absenteeism and increase productivity for your business by having a clean and healthy building.

According to the CDC, routine cleaning and disinfecting reduces the risk of spreading illnesses.

*Integrated Benefits Institute 2019 Report

**According to a 2019 study from global staffing firm Accountemps
